GET <http://localhost:3000/api/darkdata>

Génère plusieurs profils et renvoie également des statistiques agrégées

The screenshot shows a web browser's developer tools interface. At the top, a GET request to `http://localhost:3000/api/darkdata` is shown with a 'Send' button. Below this, the 'Body' tab is selected, displaying a JSON response. The response is a single object with the following fields: `email_domain` (string: "example.com"), `iban_length` (integer: 27), `card_is_valid` (boolean: true), and `quote_length` (integer: 68). The status bar indicates a 200 OK response with a response time of 487 ms and a body size of 321 B. The 'JSON' tab is selected, showing the raw JSON data.

```
{
  "email_domain": "example.com",
  "iban_length": 27,
  "card_is_valid": true,
  "quote_length": 68
}
